Rhodah Jerono Kipng'eno

Software Engineer/Developer/Data Scientist

Nairobi, Kenya | +254 708 847 933 | rhodahjerono@gmail.com

RhodahJerono

Profile

As a 22 year old graduate of Information Technology, I am a results-driven professional with a unique blend of software engineering, data science, and business analysis skills. Having previously automated key business processes for an NGO and significantly improving operational efficiency, I am currently building and optimizing data pipelines and machine learning models for a sign-language recognition product (Terp360) in an IT company. I am passionate about leveraging full-stack development (React, Next.js, Python) and data science to build scalable, real-world solutions. With a proactive problem-solving attitude, I am adept at working in agile, cross-functional teams.

Portfolio

Github
Portfolio

Technical Skills

- Programming Languages: Python (NumPy, Pandas, Scikit-learn, TensorFlow, PyTorch, OpenCV, Selenium), JavaScript/TypeScript, SQL, Java, HTML/CSS
- AI/ML & Data Science: Machine Learning (Supervised/Unsupervised), Deep Learning (LSTM, Neural Networks), Natural Language Processing (NLP), Computer Vision, LLM Fine-tuning, Model Training & Deployment
- Frameworks & Libraries: React, Next.js, Node.js, Flask, Django, Tailwind CSS, MediaPipe
- Databases: PostgreSQL, MongoDB, Supabase, Firebase, Google Sheets (with AppScript)
- Cloud & DevOps: AWS (Lambda, S3), Docker, Git/GitHub, CI/CD
- Tools & Platforms: Jira, Trello, Figma, Tableau, Power BI, Google Apps Script

Notable Projects

- **MOMHIVE (Flutter, Flask, Kafka, Redis)**: Developed a supportive community platform for young mothers.
- **Event API (NodeJS, MongoDB, HTML/CSS/JS.)**: Developed and deployed an events API and created an interface using HTML for easy management.
- **Modern Weather App (Next.js, TypeScript, Laravel API)**: Built a real-time weather forecasting app with dynamic data visualization and responsive design.
- **Activity Web App (React, Google Cloud API)**: Created an interactive web app for discovering local events.
- **Airbnb Insights Dashboard (Tableau)**: Visualized revenue trends by season, showing +20% growth in December bookings.
- **Layoffs Analysis (SQL)**: Queried datasets to identify firms with the highest layoffs; presented findings with charts and summaries.
- **Fraud Detection Insights (Python, Power BI)**: Trained a model and translated output into business-friendly visual dashboards.

Professional Experience

Founder and CTO

January 2026 - Date

Onor Consultancy - Nairobi, Kenya

- Designed(Figma), developed (Typescript), and deployed(Vercel) the Onor Consultancy website.
- Developed and shipped Vuna, a digital agricultural value-chain platform. Implemented using Typescript and Supabase(BaaS)
- Designed, developed (typescript), and deployed (Railway) Kodi, a property and rent management web app.
- Developed an ERP system for small businesses in Kenya using React and MongoDB.

Junior Software Developer

September 2025 - January 2026

SIGNVRSE LIMITED - Nairobi, Kenya

- Contribute to the development of Terp360, a flagship sign-language-to-text product, moving from a beta to a production-ready application.
- Develop and execute scripts to automate and accelerate the data collection pipeline, improving the efficiency and volume of training data acquisition.
- Assist in training and refining machine learning models (Computer Vision, LSTM networks) for improved gesture recognition accuracy.
- Build and maintain responsive web components using React, Next.js, and Tailwind CSS to enhance the user interface and experience.

Professional Experience

IT & Legal Support Intern
May 2025 - August 2025

EARTHTREE COMPANY LIMITED - Eldoret, Kenya

- Automated the end-to-end data collection, tracking, and distribution process for field operations, centralizing farmer data and improving overall data flow efficiency.
- Engineered automation scripts for procurement and vehicle acquisition workflows using Google AppScript and integrated APIs (Tipalti, Track & Trace), reducing processing time by 40% and eliminating manual errors.
- Designed and maintained a centralized SQL-based data system, improving data accuracy and access speed by 50% for field teams.
- Acted as a liaison between technical and non-technical teams, streamlining communication and accelerating reporting cycles by 30%.

Research and Technology Intern
January 2025 - April 2025

SIGNVRSE LIMITED - Nairobi, Kenya

- Researched and built the beta version of the sign-language recognition tool using OpenCV, MediaPipe, and LSTM networks.
- Developed responsive web interfaces and optimized backend APIs with Node.js and Supabase, reducing latency by 40%.
- Prototyped computer vision features for 3D avatar rendering based on facial landmark detection.

Education

Bachelor of Science in Information Technology
September 2021 - December 2025

Kabarak University - Nakuru, Kenya

Coursera

- Online

- Google Business Intelligence Professional Certificate (2025)
- Project Management Certificate (2024)

Asana Academy

- Online

Workflow Specialist (2025)

Languages

English Native

Swahili Native
